Dear Sir/ Madam,

RE: M.Eng. Resume Page

As you may be aware, graduate students enrolled in the Master of Engineering Program (M.Eng.) Program in Mining and Mineral Processing Engineering are eligible to do a 4, 8, or 12 month coop work term.

All students in the program already have an undergraduate degree in engineering. Most have degrees in mining or mineral processing. Some have significant industry work experience. Some are bilingual and are able to work in both English and another language like Spanish, Mongolian, Cantonese, Korean, or Turkish.

All students in the program are available to work in Canada. The UBC Engineering Coop Program can assist with work permits for other locations in the world.

The resumes of students available for a coop work term are shown on the resume page. The chart outlines their undergraduate degrees, languages and work experience.

Feel free to contact me if you have any questions or concerns.

Best Regards,

A handwritten signature in blue ink that reads 'Carmen Jensen'.
